

Every year companies develop and invest in critical presentations created in Power Point that highlight specific capabilities and services offerings.

PlantServices.com has an exciting new way to enhance your presentation materials to make them an even more effective sales and marketing tool.

Our new Visual Technology Program will take your current Power Point presentations and energize them into robust, eye-catching rich media using the latest Flash technology. As an added bonus, you can provide your own custom voice over content for even greater impact.

Your new Flash presentations are now made available anytime for our viewership to review at our *Plant Services* Technology Presentation Portal located at *PlantServices.com*.

It's easy. Just provide us with your Power Point Presentations with a 20 slide limit, and voice over content and we do the conversion and enhancements to Flash. We even include free month reporting with a registration page.

Pricing is only \$3,000 net per month for the entire service.

Make your presentations work for you with the new Visual Technology Program from *PlantServices.com*.

NEW SALES ARE JUST A CLICK AWAY!
